# Hope Mills Stormwater
# Clean water, Clear choice.

## What do you want to know about your Stormwater Program?

Every April, the Stormwater Department hosts an annual public meeting to allow Hope Mills citizens the opportunity to learn more about the Stormwater Program, ask questions, and give the deparment their input.

So as we look forward to this year's presentation-What would you like to know? Are there any issues you would like addressed? Questions or concern you have?

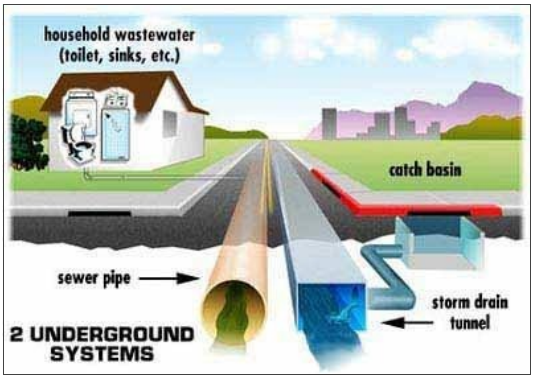
Let us know and we can be sure to include this information in the meeting. You can reach us by phone, email, or in person. We look forward to your input!

## Archer Road Phase I Construction

The stormwater portion of the construction project that has the goal of reducing the runoff from the Brower Park baseball fields has been completed. This project is the first of three phases to improve the stormwater infrastructure in the area. Phase II Engineering for the Archer Road Project should begin in the upcoming months.

## Welcome to our new staff!

The Stormwater Department has a new Stormwater Technician-Beth Brown. Ms. Brown has a great deal of water quality experience and we're excited to have her on board. Make sure to welcome her to the Town of Hope Mills and the Stormwater Department!



## Don't forget-Stormwater runoff isn't treated before it enters our local waterways.

Wastewater and stormwater are two separate systems. Unlike wastewater that flows from your household toilets and sinks into the sewer system that leads to the wastewater treatment plant, stormwater isn't treated. Everything that enters our storm drain system goes straight into our local rivers, lakes, and creeks! Clean water is a clear choice!
