## **Rental Housing Repair Program**

Owners of rental housing whose properties were damaged in Hurricane Matthew may obtain a loan covering up to one hundred percent (100%) of the cost of repairing such damage. Our goal is to deploy these funds quickly in order to get as many units as possible back into the affordable housing inventory as soon as possible.

These loans will:

- Have a 3-year term
- Have a fixed interest rate of 2%
- Require only quarterly payments of accrued interest during the term
- Have the possibility of being up to 50% forgiven if the property is operated as disaster recovery affordable housing throughout the term

## **Affordable Housing Development Program**

Developers of affordable housing, both multi-family and homeownership, can obtain flexible loans to accelerate the development of “shovel-ready” projects that will expand access to disaster recovery affordable housing in the affected region. Loan proceeds must be able to be deployed within 90 days for either acquisition or development activities.

These loans will:

- Have term between 12 and 36 months
- Have a fixed interest rate of 2%
- Not require payments of principal or interest during the term
- Have flexible terms and conditions and may be coordinated with other sources of financing
- Have the possibility of being forgiven up to 50% if the property is operated as disaster recovery affordable housing throughout the term
